

# BUILDING SPECIFICATIONS

---

NOVA POLOP RESIDENTIAL AREA, PLOT 4, C/ ROTTERDAM, C/ BRUSELAS,  
C/PEATONAL LIEJA Y C/ PASSEIG DE LA SOLANA

## FOUNDATIONS AND STRUCTURE

---

- Foundations of reinforced concrete footings braced in two directions
- Structure employing one-way slabs and orthogonal framework.
- Waterproofed foundation walls and buried structures using SBS-modified, LBM (SBS)-40/G-FV, bitumen after priming with asphalt emulsion.
- Foundation walls and buried structure drainage using dimpled drainage sheeting with integrated geotextile.

## ROOFS

---

- The homes have two types of roof:
- Roof type 1 – walkable: flat, unventilated, with 50-cm thick thermal insulation. Single layer of waterproofing finished with non-slip porcelain tiles as used on the terraces and priced at €15/m<sup>2</sup>.
- Roof type 2 – non-walkable: flat, unventilated, with 50-mm thick thermal insulation. Waterproofed and finished with rounded gravel aggregate.

## EXTERIOR AND PARTITION WALLS

---

- Exterior of perforated 11-cm ceramic brick. Thermal insulation based on 5-cm polyurethane foam as per regulations with an inner sheet of 7-cm perforated ceramic brick.
- Internal partition walls of plastered 7-cm ceramic brick.

## SURFACE COVERINGS

---

- Interior walls and ceilings in smooth plastic paint over two coats of sanded filler.
- Interior: smooth plasterboard ceiling, with 15-mm thick plasterboard over a hidden galvanised steel structure.
- Toilet where the air conditioning unit is located: perimeter of 15-mm plasterboard tray and the remainder with removable ceiling.
- Outside terraces and porches: false ceiling of special board for exteriors
- Porcelain or wood look ceramic tiling in the entrance area, priced at €15/m<sup>2</sup>.
- One white water-repellent layer coat on the exterior walls.
- Window sills with flashing in Capri limestone.

# BUILDING SPECIFICATIONS

---
